**"METHODS OF IDENTIFYING PATTERNS IN
BIOLOGICAL SYSTEMS AND USES THEREOF"**
Our File: 02331-0161 (42286-267669)

Dear Tim:

Enclosed is a copy of a "Notice to File Missing Parts of Non-Provisional Application" which we received from the U.S. Patent and Trademark Office regarding the above-referenced application. A Notice to File Missing Parts identifies items missing from a patent application at the time that the application was filed. The above-referenced application was filed without a Declaration and Power of Attorney and the Government Filing Fee.

We must file a response to the Notice to File Missing Parts by **June 8, 2002**. However, this date may be extended for up to four additional months with payment of appropriate extension fees.

We have prepared and enclosed a Declaration and Power of Attorney for Isabelle Guyon and Jason Weston's review and signature.

Mr. Timothy P. O'Hayer

DECLARATION AND POWER OF ATTORNEY

We ask that you have Isabelle Guyon and Jason Weston read the enclosed "Declaration and Power of Attorney". If the statements contained within the Declaration and Power of Attorney are true, please have them sign and date the document where indicated, being careful to sign exactly as it appears within the signature block.

Please return the executed Declaration and Power of Attorney to us as soon as you can. We will then file a response to the Notice to File Missing Parts at the Patent Office on BioWulf Technologies' behalf.

If you have any questions, please contact us at your convenience.

Cordially yours,

Janina A. Malone

Re: Patent application "Method of Identifying Patterns in Biological Systems and Uses Thereof",
Attorney docket no: 02331-0161 (42286-267669)

June 3, 2002

Dear Marge,

Thank you for your mail. After reviewing the document that you are asking me to sign and the heavy patent application, I have the following comments:

- 1) As per the declaration of power of attorney, I have the "duty of candor" to disclose all I know and not make wrong claims. As it turns out, I know for sure that we cannot make claim 1, as there was prior art. The other claims would be fine, except that I do not really understand claim 5.
- 2) In the description of the invention, everything up to page 38 has not been drawn from work I have done, and I do not think it was drawn from Jason's work either. I cannot endorse the validity and certainly not authorship of that work.
- 3) There are a number of patent applications referenced to by numbers of which I do not have a record. I need to be sent the titles, authors, abstracts and claims of these patents together with their filing number (not a box of papers with all the text please) so that I know what they are referring to.
- 4) For the rest, I can certainly not claim that I have reviewed it thoroughly enough to sign the declaration of power of attorney the way it is phrased and certainly would not want to risk fine or imprisonment. This is an enormous amount of work. I got a copy only end of May with just a few day's notice to sign the first appointment document I received (which I did sign).

As per my contract and also as I feel is my duty, I have obligation to help you. However, I need to get notice soon enough that I have enough time to review the material you send me. I should request 6 weeks to review the filings that you send me. At the time I receive the proposed filing document, I would like to get also ALL the documents I will have to sign so that I can also review them and make sure that I comply with the law requirements.

Also as per my contract, the company should pay me for my assistance my standard hourly rate and indemnize me with \$100 per patent filed. Since the company owes me already \$507.23 in unpaid expenses and \$5700 in salaries, I should require to be paid in advance.

Thank you very much in advance.
Best regards,

Isabelle Guyon

**"METHODS OF IDENTIFYING PATTERNS IN

Our File: 02331-0161 (42286-267669)

Dear Isabelle,

Thank you for your facsimile of June 3, 2002. We would like to address your points in order.

In response to point 1, the "duty of candor" is to disclose all prior art that is material to the examination of the patent. This duty is defined in 37 C.F.R. §1.56 as information that is not cumulative to information already of record or being made of record in the application. Under this rule, your responsibility is to provide prior art, references, or articles that are relevant to the claims of the application. We would therefore ask that you provide us with any prior art of which you are aware, which falls under this definition.

In response to points 2 and 3, this application is a continuation-in-part application. This means that the specification consists of old and new material. The old material claims priority through the list of patents at the beginning of the application. In signing the declaration, you are agreeing that you are the inventor of at least one of the claims of the current application, not of all of the background material contained in the continuation-in-part application.

For your reference, we are providing a list of the patents and patent applications to which this application claims priority. A copy of the claims and abstracts of

ATLLIB02 81857.1

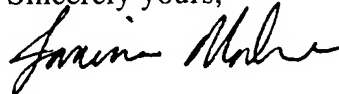

Dr. Isabelle Guyon
June 13, 2002

the patents and patent applications to which this application claims priority and on which you are an inventor is also attached.

In response to point 4, by signing the declaration, you are stating that you are not willfully deceiving the U.S. Patent Office.

If you have any further questions, please do not hesitate to contact us.

Sincerely yours,

A handwritten signature in black ink, appearing to read "Janina A. Malone". The signature is fluid and cursive, with the first name "Janina" being more prominent.
